

## Water System Improvements Stakeholder Meeting

Wednesday, July 28, 2021, 6PM - 7PM at Village Hall, 1904 174th St.

We are going to begin a major water system improvement construction project throughout the Village.

The improvements are:

- New water main on Lathrop Ave. between 175th and I-294
- Removal of lead water service lines and replacement with new copper water service lines in the residences of Bremerton Woods
- New water meters for the majority of the Village
- New fire hydrants and water valves throughout the Village
- New chlorine analyzer for monitoring water distribution

Every home and business in the Village will be affected by these projects. It is important that we hear your personal questions and concerns so that we can focus our efforts on any issues that might be brought up.

This meeting will be an informal open forum discussion to "brainstorm" with you and to answer any questions or concerns you may have.

We will have display boards with the project areas identified for the water main and lead service line project. We will also have photos of typical construction, a physical model of the interior plumbing for the lead service line replacement and a model for the new water meters on display.

We understand that you may have questions and concerns and your first-hand input is invaluable; we look forward to working with you to make this project a success. This is the biggest water project in decades within the Village. The project will improve efficiency, reduce maintenance, save the Village money, and most importantly it remove all lead pipes from the system. We have worked to obtain funding from the State and Federal government to help with these improvements, and are pleased to report that the Village will take out a low interest loan for half of the project costs, and the other half will be forgiven through the State Revolving Fund loan program.

We want to make the project even better. Your input will help us to do that. Now is your time to be heard! We look forward to seeing you on the 28th.
